

LOSS AND DAMAGE DUE TO CLIMATE CHANGE

UNDERSTANDING VALUES, VULNERABILITY AND LIVELIHOOD SECURITY

We explore novel angles to assessing loss and damage under the UNFCCC, particularly intangible and non-market aspects. We offer insights into what people in specific places deem worth protecting yet at stake, with experiences from and urgent recommendations for Southeast Asia, Africa, and the US.

COP22 - SIDE EVENT

SATURDAY, 12 NOV 2016

11:30 - 13:00
